TRAINING EXPERIENCE

Machine Learning Intern — Jun 2021 – Jul 2021

JOVAC, GLA

- The dataset contains a bunch of emails classified as ['spam'] and a bunch of emails classified as ['ham'].
- It aims to test a ML model on real Gmail emails to evaluate it's accuracy.
- We first build the model and then we extract our "NORMAL" emails from our inbox and then we feed the built model with them to know whether it would classify them as spams (which means our model is bad) or normal (which mean our model is very good).

IOT Intern — Jul 2021 – Sep. 2021

ERA Interfaces, Bangalore

- Developed an Light Automation with 3D Modelling.
- Implemented using Arduino, PIR Sensor, LED and Buzzer.
- It spots the human activity and based on it, PIR Sensor will make the Arduino to turn on or off the LED.
